470 Mercruiser Engine Problems

The popular 470 was not without its problems. Its water pump is cam-driven and the pump's seals tend to develop leaks over time. Replacing the seals before a leak can allow the coolant to contaminate the engine oil is critical, or the resulting repair can be costly.

Mercruiser 470 Engine Facts | It Still Runs

This forum has a multitude of posts regarding "Mercruiser 470 running problems....". The condition of the spark plugs can tell you alot about the engine's ignition condition. Start w/the basics; tuneup--points, condenser and spark plugs. Inspect the distributor cap and rotor for wear and replace if needed. Perform a compression test on the cylinders.

Mercruiser 470 running problems.... - Marine Engine

I'm having major problems with mercruiser 470. 1986 model. Coolant is rapidly going into engine oil from closed loop. Filled up coolant and ran boat at around in bayshore for 30 minutes and back to dock. Lost nearly 2 gallons and was blowing milky oil out breather. Show More. Show Less.

I'm having major problems with mercruiser 470. 1986 model ...

Other issues with the 470 / 3.7 Liter Mercury Marine 4 cylinder: 1. Early model heat exchanger (3") was too small. 2. Charging system prone to failure. 3. Head gaskets easily damaged in severe overheats. 4. Motor mount failure due to engine shaking when cold. (1) Early model 470's used a 3" diameter heat exchanger which proved to be inadequate.

Mercruiser 470 Coolant Leak - Sterndrives

Many customers ask about replacing the 470 engine with the current 3.0L engine since they are also are an inline configuration. The problem with this is that the 3.0L makes approximately 135 Hp & 180 Lb-Ft of torque where the 470 made 190 Hp and approximately 275 Lb-Ft of torque. The 3.0L engine is simply too small and does not make enough torque.

Replacing the seals before a leak can allow the coolant to contaminate the engine oil is critical, or the resulting repair can be costly. Mercruiser 470 Engine Facts | It Still Runs

470 Mercruiser Engine Problems - download.truyenyy.com

I do not believe that Mercruiser makes (designs/fabricates) any of their engines. They only outfit them for marine use. Mercruiser makes the outdrives. So, the engine itself may be a Ford, but mostly Mercruiser and Volvo-Penta use GM engines. Bottom line on that boat is \*1986\* and \*340 hp\* for a 27 foot boat, which seems a bit under powered.

Mercruiser 170, any good? - BoatingABC.com

First, remove the hose from the heat exchanger that runs to the outdrive. With the muffs on, run the engine for a few seconds and make sure you have good water flow. Then check the circulating pump...
