Design : A Unified ...

Design Metrics of

Embedded Systems A

Design Metric is a

measurable feature of

the system

performance, cost, time

for implementation and

safety etc. Most of these

are conflicting

requirements i.e.

optimizing one shall not

optimize the other: e.g.

Acces PDF

Embedded

a cheaper processor may have a lousy performance as far as speed and throughput is concerned.

Line coding -

STUDYTRONICS

This is the first book on embedded systems to offer a unified approach to hardware and software specification and design issues -- and

Acces PDF

Embedded

the first to outline a new  
specify- explore-refine  
paradigm that is  
presently being used in  
industry in an ad-hoc  
manner, but until now  
has not been formally  
described.
