take the reverse approach and teach the syntax of variables and if statements without giving them meaning.

~~A Strategy for Teaching Programming – Logic First~~

Just like computer programs, these instructions use a specific syntax that includes variables, loops and decisions (If...then...else). For example, if you need to knit 50 rows, you will knit one row at a time until you reach row 50. Therefore, the equivalent program could be, ‘ If row is 50, then stop.
